

# GO SURVIVOR

ULTIMATE WEAPON IN THE BATTLE FOR SAFE WATER

Part No: TYP/BG/2L/M.A.D./IPA  
NSN: 8465-99-148-4748

Trying to escape and evade is already a dangerous business made more difficult if your pilots are forced to pick up and drink contaminated water

## GO SURVIVOR IS THE CHOSEN SOLUTION

Consuming water at an available source is a potentially dangerous activity because the hostile forces will be aware that water becomes a high priority, very quickly.

Collecting potentially contaminated water and purifying on the move is the only real option

Go Survivor was designed in conjunction with Royal Air Force survival school and RAF Pilots. This innovative easy to use lightweight product uses Pure Hydration's tried and tested Mechanically Advanced Disinfection (MAD) inline Purifier

The GO Survivor creates safe water (approximately 350 litres-100 US gallons). It is extremely easy to use, simply fill the bag from available sources and drink, water is instantly purified on demand

## DESIGNED FOR & USED BY

- RAF Fast Jets inc Typhoon
- RAF Aircrew Survival Pack
- Martin Baker
- BAE Systems
- JSF - F35

Martin baker JSF-F35 test Sled

## Why the Go Survivor?
