

SURVIVOR RANGER™

ULTIMATE WEAPON IN THE BATTLE FOR SAFE WATER

Part No: SVR/B/RNG/750 NSN: 4610 - 99 - 133 - 7482

The **Survivor Ranger** is a personal water purifier which is capable of quickly turning up to 350 litres (100 gallons) of potentially contaminated water into clear, clean & safe drinking water.

Operating away from a fixed base for extended periods is challenging enough, it's made more difficult when you have to carry all drinking water with you.

The Ranger is ergonomically designed to fit the hand & channel the water through the purifier with minimum pressure required which will produce safe drinking water from any available sources.

Why the Survivor Ranger?

- **Our Survivor Purifier meets and exceeds US EPA Guide Standard for Microbiological Water Purifiers and NSF protocol 231 – US compliance Environmental Protection Agency – EPA's Microbiological Reduction requirements as shown in the US National Primary Drinking Water Regulations (<http://epa.gov/safewater/mcl.html>) under the Safe Drinking Water Act**
- **UK compliance Water Supply (Water Quality) Regulations 2000**
- **EU compliance European Drinking Water Directive Council Directive 98/83/EC**
- **Tested & approved for use by the UK MOD**
- **Meets and exceeds the US EPA Guide Standard for Microbiological Water Purifiers and NSF protocol 231**
- **The only purifier product fully endorsed by the Hospital of Tropical Diseases London**
- **Use on rivers, streams, Lakes, rock pools, standing or stagnant water**
- **NO Chemicals required & NO waiting time – Instant virus level protection**
- **No moving parts**
- **Capacity: 750 ml (25oz)**
- **Weight: 129g (4½oz)**

Bottle impregnated with FDA approved antimicrobial to stop microbes growing on the surface of the bottle

Unique shape acts as a physical pump

Tough FDA approved ABS plastic

Bottle made from food grade FDA approved low density polyethylene

M.A.D. Disinfection media

750ML capacity

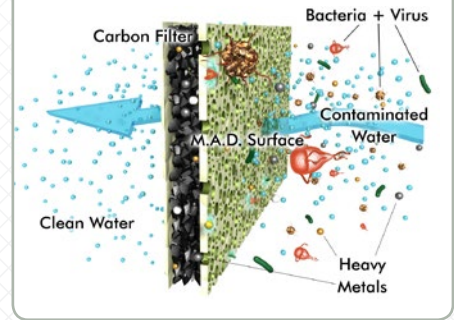

What does it remove

- ✓ Viruses & Bacteria
- ✓ Pathogens (including Cryptosporidium & Giardia)
- ✓ Bad tastes & odours
- ✓ Chemicals (including VOC's, SOC's)
- ✓ Heavy metals
- ✓ Faecal matter

Disinfection technology (M.A.D) that removes even the smallest virus and bacteria, cysts and spores.

How it works

Designed and Engineered in the United Kingdom
